

# Spring Data (JPA) REST

Session 03

# Building a simple microservice with Spring Data (JPA) REST

```
@Entity
@Table(name = "city")
public class City implements Serializable {

    @Id
    @GeneratedValue
    private Long id;

    @Column(nullable = false)
    private String name;

    @Column(nullable = false)
    private String county;

    //...

}
```

# Building a simple microservice with Spring Data (JPA) REST

```
@RepositoryRestResource(collectionResourceRel = "cities", path = "cities")  
public interface CityRepository extends PagingAndSortingRepository<City, Long> {}
```

# Building a simple microservice with Spring Data (JPA) REST

```
@SpringBootApplication
@EnableJpaRepositories
@Import(RepositoryRestMvcConfiguration.class)
public class Application {

    public static void main(String[] args) {
        SpringApplication.run(Application.class, args);
    }
}
```
